

Achieve business goals

with AT&T Global Video Solutions

Fully Managed, Hybrid-Cloud

Enterprise Video as a Service Platforms (EVaaS)

Imagine... A unified and scale-rich streaming platform including:

Video Content Management & Streaming

Gain full visibility and control of all video content across the enterprise with one platform

One centralized library for managing and hosting all corporate videos

Live stream directly from the platform or video meeting solutions

Enterprise Signage

Deliver live or on-demand video content to the entire network of displays:

Corporate Signage
 Desktop Signage
 Screensaver Signage
 QR Code Management
 Elevators, Kiosks, Schedules,
 Directories, Facility Maps...

IPTV

Watch live TV programs and record them as a media resource for on-demand viewing from your digital library

Leverage your existing network Stream IPTV content to a smart TV, a computer display, a smart device and a wide range of other devices

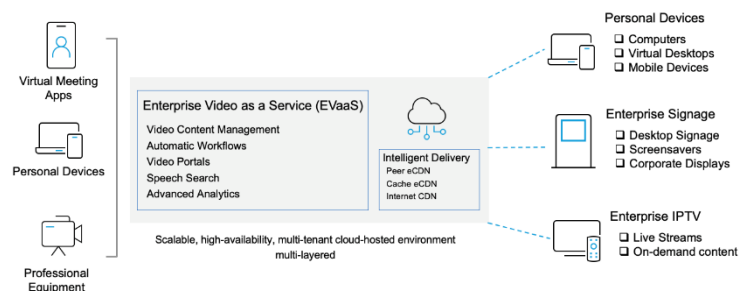

Why Managed Video Services?

Hybrid workplace has forced companies to accelerate their video communications strategy, creating increased complexity

GVS provided a single managed solution:

- For all enterprise video use cases: streaming, signage, IPTV – Live & On-demand
- HD Broadcast quality capabilities for scale, performance, extensibility, and security
- Any content – Any Device – Anywhere – Anytime

Reach employees and partners with secure video, anytime, everywhere on every screen or device
